Boris M. Schein

JUN 22, 1938 - OCT 4, 2023

Boris M. Schein passed away peacefully on October 4th, 2023, with his family by his side. He was 85 years old.

Born in Moscow, Russia in 1938 to Moses and Sophia Schein, he was only child.

In the year 1941, after Germany attacked Russia, the family was evacuated to Saratov, a large industrial city on the Volga River.

He completed his school and university education in Saratov and joined the faculty of the mathematics department there.

In 1979 he brought his family out of the Soviet Union and several months later settled in Fayetteville, where he spent the rest of his career as a Distinguished Professor at the University of Arkansas. He was devoted to his family, made major research advances in his field and guided generations of students.

He leaves behind his wife of 57 years, Eugenia, his son Michael and wife, his son-in-law, and three grandchildren.

His daughter, Dina, predeceased him.

Boris M. Schein

JUN 22, 1938 - OCT 4, 2023

Serge Lieber shared a video to the **80th anniversary of B. Schein.** album.

March 13 at 11:40 AM

Serge Lieber posted:

Our sincere condolences. B. Schein studied and then worked at SGU. While still a student, he began his scientific activity. After successfully defending his candidate's thesis and then his doctoral dissertation, he has authored over 150 mathematical publications. His scientific results have gained international recognition. Under his scientific guidance, many candidates defended their dissertations, and subsequently, numerous graduate students became well-known scientists, such as V. Trokhimenko, V. Molchanov, and D. Bredikhin. In 1978, B. Schein immigrated to the USA, where he worked as a professor at the University of Arkansas from 1980 onwards. During his time in the USA, he often visited Israel, where he relocated and currently works as a mathematician at Bar-Ilan University — his son, Dr. M. Schein. The presented video captures a meeting, dedicated to the 80th anniversary of B. Schein. The provided video captures a segment from a meeting dedicated to the 80th anniversary of B. Schein. Its participants before moving to Israel were also connected to the SGU (Saratov State University) and to B. Schein. A. Shulman studied at SGU, E. Roiz studied and defended his candidate dissertation under the supervision of B. Schain. S. Lieber worked together with B. Schain at SGU. A. Sandler worked at SGU, and under his guidance, B. Schain began his studies at the university as a student. This note is dedicated to the memory of the remarkable person, prominent scholar, and academic mentor B. Schain. Authors: S. Lieber, E. Roiz, A. Shulman.

Peter Pulay posted:

Our sincere condolences. Peter and Agnes Pulayl (Peter), coming from behind the Iron Curtain, had occasional political conversations with him. I remember that they (and Boris' mother-in-law) lived at the Maria H. Apartments. For some reason, Boris did not want to buy a house. He was an excellent mathematician, excelling in group theory which is important in modern physics and chemistry. I have found out that we even had a common acquaintance, a chemistry professor at Saratov, whom I met at meetings in Europe, and who used to have lunch at the Scheins' house every Sunday. The world is small.
